Page 2 of 17: How to Navigate this Module

Learn how to navigate this module by clicking on any of the magnifying glass icons available on this page.

Module Searching

You can search the module by clicking the magnifying glass in the top right corner of the menu.

In the search box that appears, enter the keyword(s) that you wish to locate.

The result will be a list of module sections that includes the keyword(s).

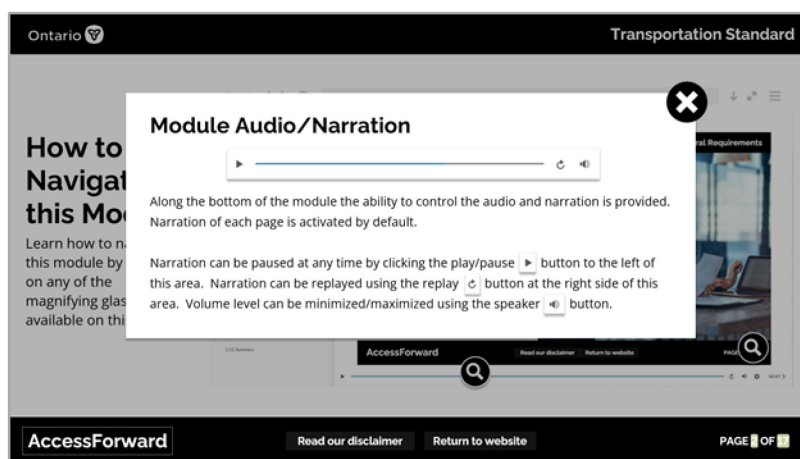

Module Menu

The module menu appears along the left side of your screen and includes all available content sections.

Clicking on a menu item will take you to the section of the module selected.

The section you are currently in will be highlighted by a colour strip on the left.

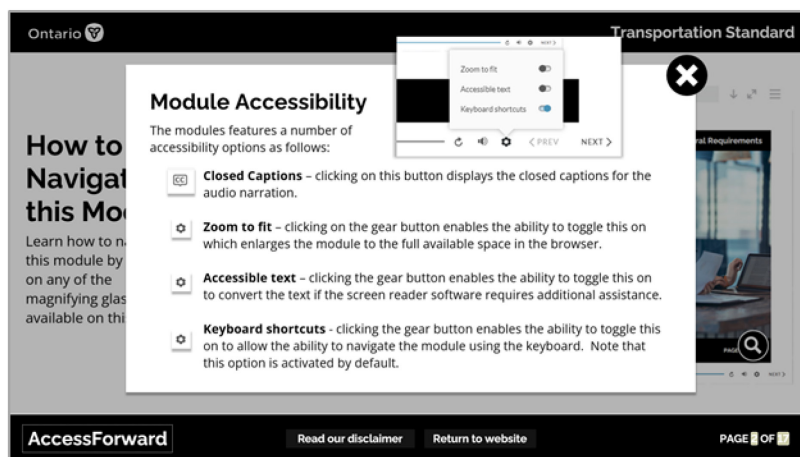

Previously viewed sections are indicated by the appearance of a checkmark on the right.

Module Audio/Narration

Along the bottom of the module the ability to control the audio and narration is provided. Narration of each page is activated by default.

Narration can be paused at any time by clicking the play/pause button to the left of this area. Narration can be replayed using the replay button at the right side of this area. Volume level can be minimized/maximized using the speaker button.

Module Accessibility

The modules features a number of accessibility options as follows:

Closed Captions - clicking on this button displays the closed captions for the audio narration.

Zoom to fit – clicking on the gear button enables the ability to toggle this on which enlarges the module to the full available space in the browser.

Accessible text – clicking the gear button enables the ability to toggle this on to convert the text if the screen reader software requires additional assistance.

Keyboard shortcuts - clicking the gear button enables the ability to toggle this on to allow the ability to navigate the module using the keyboard. Note that this option is activated by default.

Page 3 of 17: Organizational Classification Chart

Ontario  Transportation Standard

Organizational Classification Chart

The 5 classes of organizations:

- + Government of Ontario and the Legislative Assembly
- + Large designated public sector organization
- + Small designated public sector organization
- + Large organization
- + Small organization

Designated public sector organization: refers to organizations listed in Schedule 1 (Broader Public Sector) of the Integrated Accessibility Standards Regulation. These organizations include hospitals, universities, colleges of applied arts and technology, district school boards, and organizations that provide public transportation.

Designated public sector also means every municipality and every person or organization listed in Column 1 of Table 1 of Ontario Regulation 146/10, of the Public Service of Ontario Act, 2006.

Page 4 of 17: Introduction Video

The screenshot shows a video player interface. At the top, there's a black header with the Ontario logo on the left and 'Transportation Standard' on the right. Below the header, the main content area has a light blue background. On the left side of this area, there's a text block titled 'Transportation Standard' followed by two paragraphs of text. Below the text is a 'Video Transcript' section with a download icon and a link to 'Download a full written transcript of this video.' To the right of the text is a large video player window showing the title 'AccessForward Training for an Accessible Ontario' and a video player control bar at the bottom. At the very bottom of the page, there's a black footer with the 'AccessForward' logo on the left, two buttons 'Read our disclaimer' and 'Return to website' in the center, and 'PAGE 4 OF 17' on the right.

In this module you will learn about the requirements of the Transportation Standard.

The Transportation Standard sets out the requirements that will prevent and remove barriers to make it easier for people to travel in Ontario. Watch this video for an introduction to the standard.

Video Transcript

Download a full written transcript of this video.

Now let's take a closer look at who must comply and the requirements of this standard.

AccessForward: Training for an Accessible Ontario Off We Go!

Introduction to the Transportation Standard – Integrated Accessibility Standards Regulation

NARRATOR:

Do you remember the freedom you felt when you learned to ride a bike? What power, being able to bike over to a friend's house any time you wanted, rather than wait around for your parents to drive you.

The world opens up when you can get from one place to another.

From home to a job. From your workplace to a doctor's appointment to a movie downtown with friends and back home again.

Transportation can empower people; it means independence, opportunities for employment and social engagement.

Over the years, there have been significant achievements in making public transportation services accessible.

And the design improvements that were done to address accessibility have been found to help us all.

Stop announcements on public transportation vehicles help tourists, newcomers and those who are just too absorbed in their book to know where they are.

Grab bars help us all when a train needs to stop abruptly.

Clearly marked route signage on a bus.

But there's always more that can be done.

The regulation sets out requirements that apply to...

Conventional transportation services such as buses and commuter trains.

Specialized transportation services designed specifically for people with disabilities.

And, transportation services that may be provided by school boards, hospitals, or colleges and universities.

There are also requirements for municipalities concerning accessible taxicab services, as well as accessible bus stops and shelters for those that offer conventional transportation services.

The goal is to build more accessible communities.

With accessible transportation we will give everyone an opportunity to experience independence.

We open up the world to us all.

The Transportation Standard, as outlined in this module, addresses ways to prevent and remove barriers to public transportation so that everyone can more easily travel in Ontario.

Slide 6 of 17: Who Must Comply?

Ontario  Transportation Standard

Who Must Comply?

The Transportation Standard applies to conventional and specialized public transportation providers that operate solely in Ontario, namely:

- Conventional transportation services such as:
 - Transit buses
 - Motor coaches
 - Rail-based transportation (e.g., subways, commuter trains, etc.)
- Specialized transportation services for people with disabilities

It also applies to:

- Other transportation services provided by:
 - Public school boards
 - Hospitals
 - Colleges
 - Universities
- Municipalities, including those that license taxicabs or that provide conventional transportation services
- Certain ferries

AccessForward [Read our disclaimer](#) [Return to website](#) PAGE 1 OF 1

Slide 7 of 17: Examples of Who May be Exempt

Ontario

Transportation Standard

Examples of Who May Be Exempt

There are transportation service providers that don't have to comply. Select the heading below for some examples:

- Examples of who may be exempt

Those who may be exempt from compliance include:

- Limousines and town cars
- Shuttle vehicles, for example at:
 - Airports
 - Hotels
 - Casinos
- Faith-based organization vehicles
- Tour buses and tour/charter boats
- Private school transportation
- Rides and trolleys/trams (as in amusement parks)
- Federally regulated transportation services such as airlines, VIA Rail and Greyhound

- Making specialized services available to eligible visitors.
- Coordinating connections with other specialized providers in neighbouring municipalities.
- Not restricting the number of trips that a person with a disability can request.

Slide 12 of 17: Other Transportation Service Providers

Select the headings below to see what some of the requirements are for other transportation service providers:

Public school boards

Public school boards (as defined in the regulation) that provide transportation services for students must provide integrated accessible school transportation services.

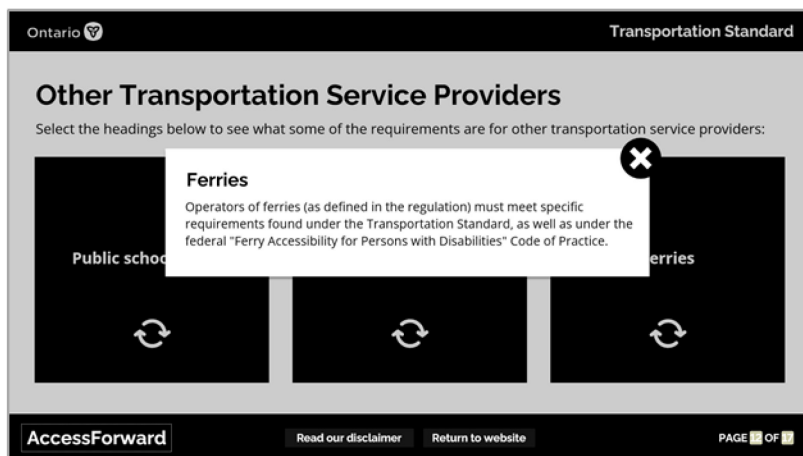

If that is not possible, or if it is not the best option for a student because of the nature of his or her disability or safety concerns, then the school board must provide appropriate alternative accessible transportation services.

Public school boards must also develop individual school transportation plans for each student with a disability.

Hospitals, colleges, and universities

When requested, hospitals, colleges, and universities that provide transportation services, such as shuttle buses, must provide accessible vehicles or equivalent services.

Ferries

Operators of ferries (as defined in the regulation) must meet specific requirements found under the Transportation Standard, as well as under the federal "Ferry Accessibility for Persons with Disabilities" Code of Practice.

Integrated accessible school transportation services

Integrated transportation means that all students, including students with disabilities, travel on the same school transportation vehicles.

Slide 13 of 17: Duties of Municipalities – Taxicabs

Municipalities must consult with their accessibility advisory committee, if one has been established, the public, and people with disabilities to determine the proportion of on-demand accessible taxicabs required in the community.

Municipalities that license taxicabs must ensure that owners and operators of taxicabs meet specific requirements, which include:

- Not charging higher fares or additional fees to a person with a disability.
- Placing vehicle registration and identification information on the rear bumper.

- Making available vehicle registration and identification information to people with disabilities in an accessible format, for example, by keeping a large print and Braille copy of the information on hand.

Slide 14 of 17: Duties of Municipalities – Bus Stops and Shelters

Ontario Transportation Standard

Duties of Municipalities – Bus Stops and Shelters

Municipalities that offer conventional transportation services must consult on, and plan for, accessible bus stops and shelters in their community.

To determine what is needed to make bus stops and shelters more accessible, municipalities must consult with:

- Their accessibility advisory committee, if one has been established
- The public, and
- People with disabilities

Any planning or steps to meet the goal of accessible bus stops and shelters must be included in the municipality's accessibility plan.

AccessForward [Read our disclaimer](#) [Return to website](#) PAGE 14 OF 17

Municipalities that offer conventional transportation services must consult on, and plan for, accessible bus stops and shelters in their community.

To determine what is needed to make bus stops and shelters more accessible, municipalities must consult with:

- Their accessibility advisory committee, if one has been established
- The public, and
- People with disabilities

Any planning or steps to meet the goal of accessible bus stops and shelters must be included in the municipality's accessibility plan.
